Invitation for Partnership in Training

CampusConnect
An AIA Initiative

AIA invites Automation Companies, Colleges and individual Professionals to nurture a nationwide CampusConnect Initiative

Automation Industry Association of India (AIA), is sharing global quality learning processes from its vast pool of member companies.

Under our CampusConnect Initiative, engineering students are entitled to receive Technology Seminars, Workshops, Tutorials and Project Exposure.

These interventions are meant to ignite interest amongst core engineering streams at the B.Tech level and supplement classroom training with case studies, videos and on-line tutorials. Industry - relevant projects will be designed and offered to deserving candidates across multiple branches of engineering - – mechanical / electrical / chemical / instrumentation / electronics / computer science / civil / textile, etc.

We are building a pool of mentors and trainers who can share case studies, facilitate idea generation for student projects and teacher training. They shall be assigned an affiliate college of their choice and a batch of students from their stream of engineering will engage with them for project guidance. Professionals from the Automation Industry and from User Organizations, with a passion for teaching and knowledge sharing are warmly invited to be part of the Campus Connect initiative.

Going forward, we shall also offer SMEs and other industries with similar opportunities for vendor-neutral learning.

For more details on course offering and affiliation, contact
